Who are we?

Robots?

People?

Aliens?

Our team is able to implement business tasks in light of modern trends and use the necessary resources for this.

We will help you find an idea for applications, support the project from scratch and up to the release, we will find and attract your users.

We do not limit projects only to the office team and are ready to attract additionally experts in narrow fields, successfully interacting with them.

Number of smartphones being used reached

1,4 billion

Every seventh person in the world has a smartphone

The average US user spends more than 2 hours with a mobile device.

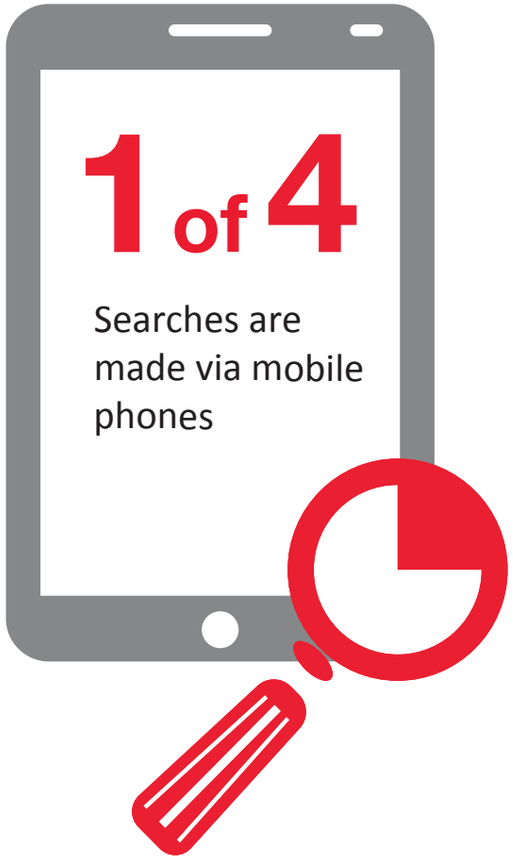
This amounts to

57 293 hours

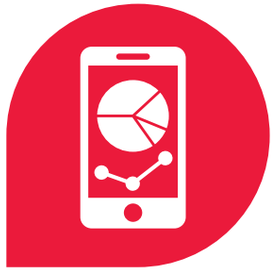
throughout life

57%

wouldn’t recommend companies with a bad mobile version of the website



Our businesses area



Apps

We develop mobile and web applications for your business and offer great ideas.

Games

We know what games users play and what users love, and we have many interesting ideas. We know how to monetize the game and how to make it successful in the market.

Adaptive sites

Your project can be efficient on different platforms. We know how to use state-of-the-art technologies for your success.

What can we suggest for your application?

Monitoring and analysis

We are conversant with the tools for analyzing and monitoring applications, actions of users and their activity on the Internet. We will help to track the number and sources of downloads, and earn money.

Successfulness of an application

We will help you to develop and implement a high quality strategy of developing and taking on the market for your mobile application using our real practices and skills.

Cross-platform compatibility

When developing applications, we understand that design and mechanics must take the screen sizes, device performance and OS version into accounts. We carry out thorough testing and debugging of applications before and after release.

Promoting of mobile apps

We know and use proven marketing tools for promoting applications in the markets and on the Internet. We will help your application ear customers loyalty and to get in the TOP.
